B&K

CONTROL - VISUALISATION

Whether for individual components, small filling plants or for complete mixing room control systems - we can develop your desired system.

Here, we are not tied to specific manufacturers, nor with user interfaces or visualisations.

The advantage is that you get total plant engineering services as well as a control system, including assembly and commissioning as a turn-key solution.

B&K

C O N T R O L - V I S U A L I S A T I O N

- Creating e-plans
- Switch cabinet construction
- Creating software (e.g. S7)
- Creating a visualisation interface on a Scada system or a touchscreen
- Database processing as well as interface communication to higher-level systems
- E-installations
- Commissioning
